

HOLD YOUR BOUQUET

01

PINS TOWARDS YOUR BODY

All bouquets have a front and a back, so make sure you hold it with the front facing forward. Pins in the back, show-stopping blooms in the front.

02

HIDE THOSE STEMS

Hold the stems towards your body and angle the front of your bouquet down.

03

HOLD YOUR BOUQUET AT YOUR BELLY BUTTON

You want your gown and hair and makeup to shine! Our florals are designed to compliment those. So holding your bouquet at your belly button (although it may feel odd) is the best way for your photographer (AND GROOM!) to capture your wedding day beauty.

TO RECAP

1. Keep the pins toward your body
2. Bold florals in the front and angle bouquet front down (so stems are towards your body)
3. Hold your bouquet at your belly button
